

COSPOLICH

WALK-IN COOLER DOORS (FIRE RATED) WALK-IN FREEZER DOORS (FIRE RATED)

CONSTRUCTION

Typical of the Cospolich standard for equipment, our Fire Rated Cold Storage Doors are worthy of the distinction of top quality. With consideration of the potential for hazards that the door system may be exposed to, it is necessary that our equipment not only meet, but exceed the National Code Standard. Performance testing has provided us with the distinction of being the only manufacturer with United States Coast Guard Approval for "A-60" Fire Rating of cold storage doors. Visit our website for other Cospolich products.

While aesthetically appealing, our Fire Rated Door System conforms to the rigorous requirements of hazardous application equipment. Using components such as steel, refractory insulation, high temperature resistant hardware, and specialty intumescent, the Cospolich door system is formidable. All of this, along with durability, corrosion resistance, and heavy gauge type 304 stainless steel make for second to none construction. Design, craftsmanship, and select materials all combine to produce a superior product.

HARDWARE

The hardware system features a positive latch with an interior release. A lock can be applied to the latch for security.

Hinges are cast iron with plated finish with extending straps for support. All fasteners used are stainless steel for greatest corrosion resistance.

INSTALLATION

The installation of a Cospolich Shipboard Door Assembly is made easy by the design and construction methods used. The door is affixed to the frame when shipped. With this the installer need only be concerned that the door assembly is hung plumb and secured properly to the or bulkhead.

A-60 (Hinge Left)

LISTED BY:
Southwest Research Institute
San Antonio, Texas

SwRI is accepted as an independent
laboratory and production control agency for
fire resistant products by the United States
Coast Guard.

Serial No. _____

Cospolich Refrigerator Company, Inc.
Norco, Louisiana

SwRI ID No. 00080-01-01

Fire Rated Marine Walk-In Cooler Door

This door has obtained an A-60 Class Rating for
an "A" Class Division steel bulkhead per IMO
Resolution A.754(18). See Authority Having
Jurisdiction's Type Approval for details.

USCG Approval No. _____

FEATURES

- 304 Stainless Steel door & casing
- Mild Steel channel frame construction
- Fire rated to A-60 standards
- Frame Heat

OPTIONS

- Custom sizing
- Hinge side (door swing)
- Voltage
